

Dear Clients!

When paying by credit card, payment processing (including entering the card number) takes place on a secure page of the processing system, which has passed international certification. This means that your confidential data (card details, registration data, etc.) do not enter the online store, their processing is completely protected and no one, including our online store, can receive personal and bank customer data.

When working with card data, the information security standard developed by the international payment systems Visa and MasterCard -Payment Card Industry Data Security Standard (PCI DSS) is applied, which ensures the safe processing of the details of the Holder's Bank Card. The applied data transmission technology guarantees security for transactions with Bank Cards through the use of Secure Sockets Layer (SSL), Verified by Visa, Secure Code, and closed banking networks with the highest degree of protection.
